

FMD-60 is a medium tough abrasive, with a majority of well-shaped, sharp particles ensuring good particle retention. It is recommended for metal bonded and electroplated tools and is suitable for flat glass grinding, pencil edging and chamfer grinding in the auto-glass and mirror industries.

Properties

- ▶ medium to high toughness
- ▶ blocky, regular particle shape
- ▶ slightly rough particle shape
- ▶ good thermal stability

Applications

- ▶ OD grinding, core drilling, universal
- ▶ glass, crystal, innovative material, silicon nitride
- ▶ diamond grinding tools, dressing tools, decorative grooving of crystal glass

Bonds

- ▶ metal
- ▶ electroplated
